EXPERIENCE

Amazon Web Services (AWS) – Seattle, WA
Solutions Architect intern

Jun 2021 – Present

- Build and document migration from typical web application using Vue.js and Node.js to AWS serverless architecture
- Shadowing customer calls with Solution Architects, both on my team and other teams within AWS
- Implementing AWS Services: Amplify, API Gateway, Lambda, RDS, Cognito, Beanstalk, Code Pipeline

Tata Consultancy Services – Remote
Software Engineer

Aug 2020 – Jan 2021

- Case study frontend and backend using Core Java and JDBC for the backend HTML and CSS for basic webpages
- Oracle and Mysql for relational database queries

The Meta (with Keywords Studios) – Redmond, WA
Software Development Engineer in Test (SDET)

Jun 2020 - Aug 2020

- Developed test scenarios in Blueprints and/or C++ for Unreal Engine actors and UMG. Work was integrated via Gitlab CI/CD.
- Created frontend scripting with JavaScript, HTML, and CSS.
- Worked with key stakeholders to discuss tool and feature limitations and options available.
